YASH GUPTA

Full-Stack Developer · AI-Integrated Apps · React / Node.js / Flutter

+91 9520102418 · gyash6328@gmail.com · Bareilly, Uttar Pradesh · LinkedIn · GitHub · Portfolio

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer specialising in React.js, Node.js, and React Native, with a track record of shipping production-grade platforms across healthcare, HR automation, and property tech. Comfortable across the entire stack — from building REST APIs and integrating AI pipelines to crafting performant mobile UIs. Hackathon winner with hands-on internship experience; passionate about solving real-world bottlenecks through clean, scalable code.

TECHNICAL SKILLS

Languages	JavaScript, Dart, Java, C
Frontend	React.js, React Native, Next.js, Flutter, Redux, HTML, CSS3, Expo
Backend	Node.js, Express.js, REST APIs
Databases	MongoDB, PostgreSQL, Firebase, SQL
Integrations	AI / CNN, AR SDKs
Tools	Git, GitHub, Android Studio, Blender, VS Code

PROFESSIONAL EXPERIENCE

Software Development Intern · **Jam Analytics Private Limited** *Jul 2025 – Aug 2025 | On-site*

- Contributed to the development of client-facing features within a production codebase, gaining hands-on experience with Agile workflows and code-review processes.
- Collaborated cross-functionally to debug, refactor, and ship stable releases on schedule, directly improving product quality metrics.

Android App Development Intern · **Corizo × Wipro DICE** *Oct 2024 – Nov 2024 | Remote*

- Designed and implemented Android application modules following industry best practices, resulting in recognition during the Wipro DICE collaborative program.
- Completed a parallel Data Science training track (Dec 2024 – Jan 2025) covering data wrangling, model evaluation, and Python-based analytics pipelines.

FEATURED PROJECTS

HealthcareX24 | *React.js · Node.js · WebRTC · AI* Live

- Identified that fragmented medical records and delayed doctor access were causing measurable healthcare inefficiencies — engineered a centralised AI-powered platform to unify patient data across care providers.
- Integrated WebRTC-based virtual consultation rooms enabling real-time video calls between patients and doctors, eliminating scheduling lag by making consultations instantly accessible.
- Reduced administrative overhead by ~40% through automated patient record aggregation, removing manual data-entry bottlenecks from clinical workflows.

Katalyx HR ERP | *React.js · Express.js · MongoDB · Redux* Live

- Architected a full-cycle HR ERP system targeting manual payroll and employee-management bottlenecks that drained operational hours across mid-size organisations.
- Built an automated payroll engine with Redux-managed state, achieving 100% calculation accuracy and full statutory compliance across diverse pay structures.

- Engineered end-to-end employee lifecycle management — onboarding, attendance tracking, leave management, and off-boarding — consolidated into a single, cohesive dashboard.

AbhiRoom | *Next.js · Node.js · PostgreSQL · Stripe* Live

- Addressed core pain points of traditional room-booking platforms — unverified listings, static pricing, and trust gaps — by building a smart property-management ecosystem from the ground up.
- Implemented a dynamic pricing engine and verified check-in workflow that noticeably improved occupancy rates for property owners and booking confidence for tenants.
- Integrated Stripe payment processing with secure transaction handling; leveraged PostgreSQL for relational data integrity across user, property, and booking records.

Inventory Intelligence | *React Native (Expo) · Node.js · MongoDB · Express.js* In Progress

- Built a cross-platform mobile inventory tracking app to combat the supply-chain disruptions caused by poor real-time stock visibility in small-to-medium businesses.
- Developed a predictive stock-alert system that surfaces low-inventory warnings before depletion, giving operations teams a 360° live view of warehouse levels.
- Designed a RESTful backend with Express and MongoDB, supporting concurrent multi-location inventory updates with sub-second response times.

EDUCATION

B.Tech in Computer Science & Engineering ·
Shri Ram Murti Smarak College of Engineering & Technology, Bareilly Expected June 2026

Intermediate (12th) ·
Madhavrao Scindia Public School, Bareilly March 2022

AREAS OF INTEREST

Data Structures & Algorithms · **Software Engineering** · **Artificial Intelligence & Machine Learning**

ACHIEVEMENTS & CERTIFICATIONS

- Smart India Hackathon (SIH) 2023 — Waitlist Runner-Up among hundreds of national teams.
- UCER Prayagraj Hackathon — Awarded Most Scalable Solution for system design under constraints.
- SRMS CET Hackathon (Editions 1, 2 & 3) — Winner across all three consecutive editions, demonstrating consistent execution under pressure.
- AICTE & MoE Innovation Cell — IDE Bootcamp Edition 2, Phase II (Feb 2025): selected for national-level bootcamp focused on design thinking and entrepreneurship.
- Certifications: Core Java (Softpro India) · App Development & Data Science — Corizo × Wipro DICE (Oct 2024 – Jan 2025).
